

About BIGBAG

The Bigbag is the preferred qualitative solution for transport, storage and transit of bulk materials, like foodstuffs and products for the building, chemical and pharmaceutical industries. Flexxolutions has over 25 years of experience producing bigbags, both in standard versions and custommade products.

All models and designs are made on customers' specification and many of these specimen are in stock, in order to be able to quickly react on changing market requirements.

The consumers' market is attended to as well through our website www.bigbag-online.nl

Models(typical):

Open top, bottom closed

Skirt top, bottom closed

Filling tube, bottom closed

Open top, emptying tube

Skirt top, emptying tube

Filling and emptying tube Bigbag Stabilon/Gambo

Bottomconstructions(typical):

Emptying knotted tube

Bottom complete opening

Emptying tube, protective flap

Cone bottom, emptying tube

Advantages Bigbag

- quality assurance by design and production under direct management
- safety design according to NEN-EN 1898 is standard and CEN/ISO, British Standard and UN requirements are optional
- safety factors of 5:1, 6:1 and 8:1 are possible, SWL (safe working load) of 500 — 2.500 kg
 - Bigbag super; dustproof without liner
 - Bigbag Stabilon®; super dustproof, form retaining, square, optimum working load
 - Bigbag filtration; special PE and PES fabrics for wet and dry filtration
 - Bigbag with PE/PP inliner; detachable, sewn or glued
 - Bigbag custom; deviating sizes, megabags up to 4.000 kg, also in Polyethylene version

About FLEXXOLUTIONS

Flexxolutions has a broad experience in development, producing and assembling innovative textile solutions for covering and storage systems for gases, liquids and solids. The addition of our subscript "Innovators in technical textile products" explains our ultimate strength. This is the innovative design of products and customer-specific engineering, production and installation of covering and storage systems as silo roofs in normal and gas-tight execution, airborne double membrane roofs serving the biogas industry and storage both in the form of pillow tanks liquids as water and high-quality bags for storage of manure, gases and combinations thereof. Besides this range of products we also designed and supply innovative (patented) disinfections mats, flexible solid storage silo's, truckliners and products for temporary refugee camps as collapsible water kits, toilets and showers. All required disciplines in terms of design (Solidworks 3D), tailoring (CNC cutting) and welding (high frequency and thermal) we have in house. Because we have all of these disciplines in house we can make your system in the shortest possible time in relation to quality, design, production and assembly.
